

How To Use The Woodbine Handicapper

Welcome to the 2019 edition of *The Woodbine Handicapper*, a handicapping book designed to make you a more informed horseplayer. *The Woodbine Handicapper 2019* provides you with invaluable information not available to the general racing public. The "gold nuggets" contained herein can be easily integrated into your own personal handicapping approach as you play the meet. Thanks to Woodbine Entertainment Group for providing this publication for FREE to all horseplayers.

What's In The Woodbine Handicapper?

This book covers the key pieces of the handicapping pie and, unless otherwise noted, is based on the results of the last two meets. The book is laid out as follows:

- **Post Position** statistics for both main track and turf courses provide you with a historic look at what post positions are dominant in both sprints and routes.
- **Trainer Summary Statistics** lists the overall record for trainers recording one win and/or 10 starts at the last two meets. Also includes the trainer's record with horses making 1st start of meet and on the turf.
- **Trainer 40% Club** lists a select group of trainers who have compiled a 40% or higher winning average (a major feat!) in a specific handicapping category. A most VALUABLE list!
- **Hares and Tortoises** is a list of those trainers who excel with horses making their 1st start of the meet (Hares), those at the top of their group with horses making a 2nd start at the meet and those who fare well with horses making 3 or more starts at the meet (Tortoises).
- **Trainer Rankings** including trainers who WIN EARLY in the early meet, KEY jockey/trainer combinations, 0'er and Low % trainers, and the BOMB SQUAD.
- **Trainer Profiles** is the meat of this book as it provides you with a full page of statistics for 102 Top Woodbine trainers. These profiles will point out each trainer's strengths and weaknesses.

Key Terms Used In The Woodbine Handicapper.

We use certain terms and jargon in this book. Here is a quick primer for first-time readers: **Race Factors** encompass several categories including race class, surface, distance, and age restrictions. Note that some trainers excel with turf runners but struggle on the dirt and vice versa.

Karma changes. Karma changes have nothing to do with Zen karma or muttering a personalized mantra as you walk around the track. What we are talking about is a change in circumstances for a particular horse since its last race. For example, if Horse A ran last on the turf and is now entered to run on the tapeta, then it's showing a karma change (surface switch). Karma changes come in many shapes and sizes:

- | | |
|--|--|
| • Distance moves (sprint to route and back) | • Rider switch |
| • Surface changes (tapeta to turf and back) | • Class moves up and down |
| • New medication (Lasix) | • Equipment changes (blinkers on or off) |
| • Trainer change (off a claim or private sale) | • Layoff of 31 days or more |

Here are some helpful hints when using the individual trainer profiles. We selected a wide variety of trainers including the obscure ones. We also selected some low-percentage trainers who are likely to start several horses at the upcoming meet. Each trainer profile is laid out identically. However, if a certain category is blank, it means the trainer didn't have any starters in that category.

- Stretchouts and turnbacks were a furlong or longer.
- MD in the Race Class category stands for maiden claimers.
- Claiming races with tags of \$40k or higher are classified as allowance races. All handicap races were classified as stakes races. Optional claimers with tags of \$40k and higher are treated as allowance races.
- Jockey/Trainer combinations include jockey mounts at the **previous** meet only.
- An "X" in the surface category = TAPETA track.

Our Trainer Stats Are MEET SPECIFIC Not Generic

As previously stated, trainer statistics in *The Woodbine Handicapper* are based on the last 2 Woodbine meets. Thus, these are **MEET SPECIFIC** stats as compared to the statistics carried in past performances published by *Daily Racing Form* and *Brisnet* and those available in the *Thorograph* speed sheets. There is a big edge in using our meet specific stats over the generic stats in *Daily Racing Form*. For example, let's assume a trainer has compiled a mediocre 5 for 30 record with 90+ day layoff runners AT ALL TRACKS during the previous 24 months. However, at Woodbine, the trainer's record is 4 for 10 in that category. The sample size of our meet specific statistics is smaller but they often provide a totally different picture.

How To Use The Woodbine Handicapper

Here's a simple approach to using *The Woodbine Handicapper*. While handicapping a particular race, note the race factors involved and then check each entrant to see if it is making any karma moves. Check to see if the entrant's trainer is listed in the **40% Club** or in the **Hares and Tortoise** groups.

Now it's time to look up the trainer's individual profile. If the trainer scores well in a particular race factor or karma move, it gives you even more confidence in the horse. If the jockey aboard hit for a high% for the trainer last year, we get an extra confidence builder. Jot down these relevant stats next to the horse's past performances in *Daily Racing Form* or the track program. After accumulating this trainer information, turn your attention to each horse and ask the following questions:

- Has it won at today's distance?
- Has it previously won on the new Woodbine Tapeta track or E P Taylor turf course?
- Has the named rider had previous success on the horse or, at least, is one of the leading riders at the meet?
- Does it have a favorable post position?
- From a speed figure perspective, does the horse match up well with the rest of the field?

If your horse fits the above profile and its trainer sports a high winning % in one or more race factor or karma move categories, then go for it. Handicappers who use our trainer statistics know that "history repeats itself at the track." There are no guarantees that your horse will win, but you will have made a logical, informed selection.

Want to play other meets besides Woodbine? See the back cover for a complete list of tracks covered by Progressive Handicapping or call 800-272-8039 for more information or any questions. Good luck at WO in '19.

Jim Mazur and James Bannon

Woodbine Trainers

Without a doubt, the trainer angle is the most important part of the handicapping pie and, as such, we have devoted two chapters to it:

- **Woodbine Trainer Stats** include overall stats for any trainer who has recorded at least 5 starts at the last two meets or recorded at least 1 win. As an added bonus, a trainer's record with horses making their 1st start of the meet PLUS the trainer's turf record is also included.
- **40% Club** is the next section. With most trainers able to win just 15% of the time overall, it's a special person who can compile a 40% + win average in one or more handicapping categories.
- **Hares & Tortoises** are top trainers with horses making a 1st, 2nd or 3rd start of the meet.
- **Win Early Trainers** shows who wins often during the first 15 racing days of the meet.
- **Trainer Rankings** lists the TOP trainers in a variety of categories and includes the invaluable 0'fers, Low % players and BOMB SQUAD.
- **Winning Woodbine Trainer Profiles** provides you with a complete statistical profile for 102 Woodbine trainers based on the last two meets.

While handicapping, look up the trainer's name in the index on page 21 (they are listed alphabetically). If not profiled, then the trainer stat line (beginning on page 10) will provide you with some hint as to a trainer's success at this meet. *As a rule of thumb, a winning average of 20% or higher in a particular category is excellent.* Pay attention to trainers who compile high average win payoffs yet win at least 10% of the time. These are the "Bombers" who just may make your day a profitable one.

The trainer profiles are easy to use and provide you with a valuable look at a trainer's strengths and weaknesses. While handicapping, remember to identify (1) the **race conditions**; and, for each horse, (2) any **karma changes** it is making. Go back to Chapter 1 if you are still fuzzy about these concepts. They are very important.

Once you have identified the "race factors" and "karma moves," then, look up the trainer's record in those categories. For example, let's assume you are handicapping a field of \$25,000 MAIDEN CLAIMERS SPRINTING on the WO TAPETA and spot a horse trained by **Lorne Richards**. In its previous race (18 days ago), the horse ran 5th versus MSW TURF SPRINTERS. When you look up **Richard's** profile, you will note the following:

- He bats 24% overall at Woodbine; his average winner paid \$9.
- Race Factor: his win % in SYNTHETIC SPRINTS races is 27%.
- Race Factor: his win % in MAIDEN CLAIMING races is 40%.
- Karma Factor: he bats 36% with horses DROPPING IN CLASS.
- Karma Factor: he clicks at a 38% rate with horses moving from TURF TO TAPETA

Of course, you will want to examine every horse in the race and make sure that the horse is (1) fast enough to compete; and (2) not bucking any major biases on the dirt strip. Yes, it takes some time to look up the numbers. But you already know the value of doing your homework.

We have analyzed thousands of races at meets all around the country and have noted that 90% of the winning horses show one or more "**karma**" changes from their previous race. The important thing to remember is that, in many instances, these karma changes act as a catalyst to "wake up" the horse. If you have any questions, call us at 800-272-8039.

Explanation of Column Headings:

Sts = Starts

W = Wins

P = Places

S = Shows

W% = Win %

I% = In-The-Money %

Pay = Average Winner Paid

\$+/- = Profit or (loss) based on a \$2 wager on each start.

Trainers in **BOLD** type are profiled in *WO Handicapper 2019*.

NOTE: Jim Ensom was the name trainer for Martin Drexler in '18. In '19, Drexler will return. As such, I have combined the 2-meet stats for these two trainers under Drexler's name.

Woodbine 40% Club

The table below contains trainers who have compiled a 40% or higher winning average (at the past two meets) with a certain race factor or karma move. Most trainers only win at a 10% clip on average, so a 40% angle is something special. Read and re-read this table. Then wait for the right situation.

Trainer	40% Angle	Sts	W	P	S	W%	I%	Avg Pay	P/L

Woodbine Hares & Tortoises

Hares start quickly (solid stats with horses making their 1st or 2nd start of the meet) but then peters out at the end of the meet. Meanwhile, horses from the Tortoise's barn often need a race or two before finding a winning spot.

Hares (1st Start of Meet)

Woodbine Trainer Rankings

The following pages contain the top Woodbine trainers in various handicapping categories. You can use these pages as a quick reference to spot the "Cream of the Crop." The table below contains trainers who compiled a high winning average (and low %) with horses making their start during the first 15 racing days of the meet. Note that this list is different from those listed as "HARES" as that group includes any "first start of the meet" which may occur even late in the meet.
